AKRAPOVIČ

MINI Cooper S / Cooper S Cabrio

Akrapovič Evolution exhaust system for the MINI Cooper S (R56) and Cooper S Cabrio (R57)

The Mini is considered a car that always brings a smile to one's face with its playful look and particularly its position on the road, which is reminiscent of driving a go-kart. The engineers from Akrapovič prepared solutions for the little devil that further increase the performance of the Mini Cooper S and the Cooper S Cabrio as well as make it sound even more appealing. Just by looking at the rear, we can see that it's an Akrapovič - namely, the rear boasts a dual exhaust system outlet of a larger diameter, shaped like racing exhausts. The homologated stainless steel aftermarket Evolution exhaust system with an integrated resonator and end muffler is equipped with adjustable tail pipes made of titanium or carbon fiber. The most demanding customers can also upgrade the Evolution exhaust system by using a down pipe with catalyst.

The Akrapovič exhaust system also improves sound characteristic, reduces drone and vibrations and makes driving even more enjoyable. The Evolution system, with the optional down pipe, greatly improves the motor's performance at all revolutions, which is evident from the enclosed diagram. The system offers an additional 8 HP and 7 Nm. Additionally, improvements to weight are not negligible, since the Akrapovič exhaust system, made of stainless steel, together with the optional down pipe, weighs 4 kilograms less than a stock exhaust system.

Evolution system with optional down pipe:

- down pipe
- exhaust system with integrated resonator and end muffler
- titanium or carbon fiber tail pipes

Hard facts:

- plus 8 HP (at 5.900 rpm)
- plus 7 Nm (at 3.400 rpm)
- 4 kg lighter than stock

Evolution system, homologated:

- exhaust system with integrated resonator and end muffler
- titanium or carbon fiber tail pipes

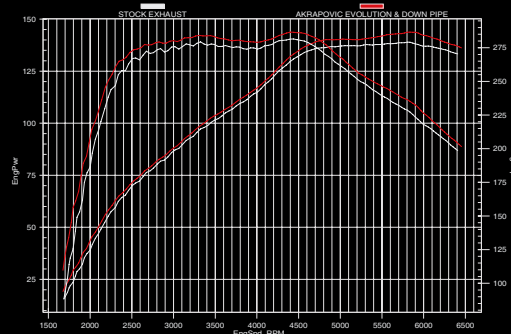

Hard facts:

- plus 2 HP (at 5.500 rpm)
- plus 6 Nm (at 3.530 rpm)
- 2 kg lighter than stock

Optional

- down pipe
- titanium tail pipe set (fits on original exhaust)
- carbon fiber tail pipe set (fits on original exhaust)

Hard facts: Stainless steel,
8 HP plus, 7 Nm plus, 4 kg lighter
