# MINI John Cooper Works

## Akrapovič Evolution exhaust system for the MINI John Cooper Works (R56)

The MINI John Cooper Works is the icing on the cake of the new-generation Mini. Already the ultimate in performance and fun, this Mini will be even more enjoyable to drive along winding roads when it's fitted with an Akrapovič aftermarket exhaust system crafted from the finest stainless steel. This street-legal exhaust system consists of an optimized link pipe, a built-in resonator, and a rear muffler. The customer can choose from two sets of tail pipes, made from either prestigious titanium or the sportier carbon fiber. Even from a distance it's easy to see that this John Cooper Works has an Akrapovič exhaust system, thanks to the 95-mm increase in diameter. Up close, the tail pipes are a work of art—they mirror our attention to the smallest of details. Akrapovič engineers have also dedicated their attention to the sound aspect of the JCW; the result of their work is the recognizable Akrapovič sound, in which no unwanted droning can be heard. The beat of these tail pipes will further inspire you to drive dynamically.

The Evolution exhaust system also improves the John Cooper Works performance. This street-legal system adds 2 horsepower and 4 Nm of torque compared to the stock exhaust and is over 2 kg lighter. A glance at the power graph shows a consistent power increase for this 1.6-liter turbo engine between 2,500 and 5,500 rpm: exactly the range most often used for dynamic driving. The JCW is a Mini icon to which the Akrapovič Evolution exhaust system adds an entire package of extras, from power and torque increases to weight reduction, the even sportier sound, and the sheer beauty of the system, which will awe passersby even when your John Cooper Works is parked.

### Evolution system, homologated:

- Exhaust system with integrated resonator and end muffler

### Hard facts:

- Plus 2 HP (at 5,220 rpm)
- Plus 4 Nm of torque (at 3,030 rpm)
- 2 kg lighter than stock

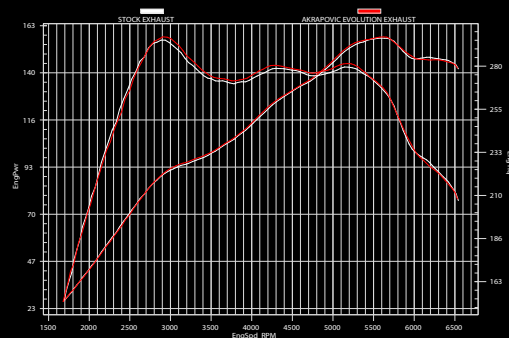

### Optional:

- Titanium tail pipe set
- Carbon fiber tail pipe set

Hard facts: Stainless steel,  
2 HP plus, 4 Nm plus, 2 kg lighter
