Porsche 911 GT3/RS

Akrapovič Evolution exhaust system for the Porsche 911 GT3/RS (997)
Akrapovič Slip-On Race exhaust system for the Porsche 911 GT3/RS (997)
Akrapovič Slip-On exhaust system for the Porsche 911 GT3/RS (997)

The Akrapovič Evolution aftermarket exhaust system is based on the same layout as the original exhaust system of the GT3 with valve control. A newly developed exhaust manifold with 100 cpsi sports catalysts guarantees an increase in power and torque, as do the newly developed and optimized pre mufflers. But the real plus of this exhaust system is the weight reduction of 17 kg, while it maintains the original layout and functionality of the exhaust caps.

The weight distribution of the vehicle is improved considerably, because of that weight reduction in the area behind the engine and the rear axle, which has a positive effect on the handling. The limit range of the vehicle adjusts upwards and so a higher transverse acceleration is possible. The combination of improved power to weight ratio (through an increased efficiency of 12 HP), torque progression by 14 Nm, and the positive effects in connection with driving dynamics enhance the performance of the GT3 distinctively. The sound impression in this configuration is somewhat more voluminous and with opened caps way more aggressive than in the original version.

Evolution system**:

- Titanium sports manifold system with integrated 100 cpsi catalysts
- Titanium pre mufflers
- Titanium link pipes with exhaust valves
- Titanium end muffler
- Titanium tail pipes

Hard facts:

- Plus 12 HP (at 5.510 rpm)
- Plus 14 Nm (at 5.740 rpm)
- 17 kg lighter than stock

Slip-On Race system:

- Titanium pre mufflers
- Titanium link pipes with exhaust valves
- Titanium end muffler
- Titanium tail pipes

Hard facts:

- More power
- More torque
- 11 kg lighter than stock

Slip-On system, homologated:

- Titanium end muffler
- Titanium tail pipes*

Hard facts:

- Plus 4 HP (at 7.390 rpm)
- Plus 3 Nm (at 6.040 rpm)
- 2 kg lighter than stock

* fits on original configuration

A note on titanium:
Not all titanium alloys are created equal. Akrapovič titanium exhaust systems are crafted from a proprietary titanium alloy. While our alloy is considerably more expensive and difficult to form than the more common "commercial" alloys, it ensures a product that is substantially more durable, dimensionally stable, and heat resistant. Unparalleled in quality, all Akrapovič products are designed without compromise to guarantee the utmost customer satisfaction.

**When installing an aftermarket Akrapovič exhaust system with sports catalysts, which are developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential "engine check light" warning signals.

The technical description of Akrapovič exhaust systems and similar products are subject to changes without prior notification. Images and illustrations can differ. Subject to technical alterations. We are not responsible for the correctness of the technical data content.

Hard facts:
Titanium, 12 HP plus, 14 Nm plus, 17 kg lighter
